

## **BROADCAST ENGINEERS PICK TELOS VX AT NAB 2010**

IP-Audio and studio phone system is winning combination.

---

12 May 2010, Cleveland Ohio, USA

Telos featured its new VX Multi-Studio phone system at NAB 2010 and received all the right attention. A panel of broadcast engineers judged the VX worthy of Radio World magazine's prestigious "Cool Stuff" Award.

"VoIP phone systems are the path business is taking, and we believe that it is the future of broadcast telephony as well," says Telos CEO Steve Church. "It's obvious that the judges, by choosing VX for an award, feel the same way too."

Radio World's "Cool Stuff" Award is given to products and technologies exhibited at the annual NAB Show, selected by a panel of expert radio broadcast engineers as notable for their design, features, cost efficiency and performance in serving radio broadcast users. Just 22 products were chosen for "Cool Stuff" Awards from among the hundreds, if not thousands, of new products on display at the convention.

"We're proud to bring the first broadcast VoIP phone system to the industry." concludes Steve Church.
