

India's "Radio Today" Chooses Telos Talkshow Systems

Living Media's Radio Outlet Selects TWOx12 for FM Broadcasts

06 December 2002, Cleveland Ohio, USA

RED FM from Radio Today, the FM broadcasting division of Living Media's India Today Group, has purchased Telos Systems TWOx12 digital talkshow equipment. TWOx12 helps ensure the cleanest, highest-quality audio from telephone callers by employing Digital Dynamic Equalization technology for clear, noise-free caller audio. TWOx12 can connect to either analog (POTS) or digital (ISDN) telephone lines.

Sold through Horizon Broadcast Electronic, India, Radio Today's TWOx12s will be installed in each of three FM stations heard in Mumbai, Delhi and Kolkatta. Active in television and electronic information distribution as well as traditional print media, Living Media is India's largest and most prestigious multimedia publishing conglomerate. Radio Today is one of the first private broadcasters in India's newly-deregulated radio industry.

The Telos TWOx12 is a multi-line telephone system designed for fast-paced talkshow production. Its twelve-line capacity offers increased flexibility for producers; unique Status Symbols® icon-based visual call management, along with improved line status signaling and Caller ID support (when used with digital phone lines), means better control of the on-air environment.

For more about the Telos TWOx12 Talkshow System, visit www.telos-systems.com/TWOx12/.
