E-Mail: dorsey@telos-systems.com**TELOS ANNOUNCES FREE SOFTWARE UPDATES
FOR SERIES 2101, TWOx12 TALKSHOW SYSTEMS**

CLEVELAND, Ohio, July 12, 2002 — Telos Systems today launched Version 2.0 software for the Series 2101 and TWOx12 Talkshow Systems.

Version 2.0 offers several new features and performance enhancements, all of which were the direct result of client feedback on earlier versions.

Benefits of Series 2101 v2.0 software consist of:

- Support for use with an enhanced range of Telco equipment
- Improved integration with Telos Assistant Producer call-screening software, including the ability to change shows remotely
- Ability to generate DTMF tones using Studio I/O keypads
- Remote system monitoring via added Telnet capability

Highlights of TWOx12 v2.0 software include:

- Allows up to 8 Assistant Producer connections
- Supports use of up to 8 Desktop Directors
- New “Auto” record mode allows automatic starting of a dedicated recording device.

Users can obtain these updates free of charge by choosing the “Software Update” menu item on the units themselves (when an Internet connection is active), or from the Telos Systems website at www.telos-systems.com/support/.

About Telos ISDN Talkshow Systems:

The Series 2101 and TWOx12 Talk Show Systems from Telos are the only multi-line talk show systems that take advantage of the digital clarity of ISDN lines to deliver clean, clear talk segments that are free of the annoying crosstalk and inducted noise that plague analog telephone lines.

Telos Annouces Software Upgrades – Page 2

Series 2101, a powerful whole-plant telephone system designed for large studio complexes, joins computer intelligence and routing capabilities with ISDN PRI (Primary Rate Interface) telephone lines, allowing broadcasters to manage up to 96 callers using T1 lines and 120 callers using E1. Designed specifically for fast-paced talkshow production, Series 2101 controls as many as 32 studios in typical configurations. Improved line status signaling and Caller ID support combine with exclusive icon-based Status Symbol™ visual call management to give unparalleled control of the on-air environment.

Telos TWOx12 brings the power and elegance of the Series 2101 to the single-studio setting. Talk show producers appreciate its large twelve-line call capacity, while hosts welcome the easy-to-understand Status Symbol icons. For added flexibility, TWOx12 can be configured to work with ISDN or analog (“POTS”) phone lines, or a combination of both.
