OMNIA CLIENTS ARE NATION'S HIGHEST REVENUE PRODUCERS *Top Billing FM Stations Rely on Omnia Processors*

CLEVELAND, Ohio, March 5th, 2001 — What do the three highest-billing FM radio stations in the U.S. have in common? They all trust the critical final processing of their stations' audio to Omnia digital audio processors.

According to data released in February by Duncan's American Radio (www.duncanradio.com), the top three FM stations in America (ranked by 2000 gross revenue) are Clear Channel's KIIS-FM/Los Angeles and WLTW-FM/New York, and CBS/Infinity's WXRK/New York. Together, these three stations account for over \$188 million in gross revenue, and all of them employ Omnia processors to help achieve the signature on-air sound that keeps their listeners loyal.

"It's been apparent for some time that winning radio stations in top markets choose Omnia," says Steve Church, CEO of Telos Systems, Omnia's parent company. "Of the top five revenue-producing radio stations in the U.S., three are FM stations. And those three use Omnia processors. I think this speaks volumes about how important clean, clear audio is to radio listeners – and also to the bottom line."

Omnia's large-market dominance is not limited to the United States. Major international broadcasters such as the BBC, Virgin Radio, Beijing Radio, Germany's RTL, and France's NRJ Network and Skyrock have similarly embraced Omnia's market-winning sound.

Omnia's newest product, the Omnia-6fm, will be featured at this year's NAB (April 23-26) in Las Vegas. Omnia-6 is notable as the first broadcast audio processor to feature the 96kHz, 24-bit sample rate embraced by the professional audio community for its superior clarity and resolution.

###

Telos Systems, with headquarters located in Cleveland, Ohio, and offices in Baltimore, Maryland; San Diego, California; and Freising, Germany is a leading manufacturer of ISDN, digital network and telephone interface products for talk-show programming, call-in radio segments, teleconferencing, audio production, remote broadcasts, and intercom applications.

Omnia, a Telos company, is world-renowned for its innovative digital audio signal processing expertise. Its family of digital audio processors for FM, AM, TV, DAB, Internet, and broadcast audio production are setting new standards for audio quality in the broadcast and Internet industries worldwide.
